

#10

Project 10:

Manufacturing unit for X-ray equipment for sterilization

Sub-sector:
Medical devices

Description

Manufacturing unit for X-ray equipment for sterilization in medical and surgical fields, and other applications - e.g. cosmetics, food processing - enabling cost optimization for users thanks to an alternative to overseas service.

Highlights

- Numerous international applications - e.g. sterilization of medical equipment, textiles, cosmetics, packaging materials... Safe, reliable and highly effective X-ray irradiation solution for processing a wide variety of products with varying densities - currently virtually non-existent in Morocco, the alternative for local players is to ship their products to Europe for sterilization, at costs 3 to 4 times higher than any local sterilization costs.

Main inputs required

- Metals

Financial indicators

- Potential investment : ~100 - 150 Mns MAD
- Potential sales : ~100 - 200 Mns MAD
- Potential gross margin: ~20% - 30%

Investment incentives

Subsidies :

- Industrial Development and Investment Fund (FDII)
- ISTITMAR SME or VSE program, depending on sales

Training assistance :

- IDMAJ" program
- TAEHIL" program

Financing :

- Mezzanine SME
- Tamwilcom
